[h_w_s CLOCK](#)  DOWNLOAD

LONDON

h_w_s CLOCK is...
a browser extension
that turns any online
text into a real-time
readable clock.

Iterating through
each text, it rotates
every "U" to the hour.

TOR

h_w_s CLOCK is a browser extension that turns any online text into a real-time readable clock.

Iterating through each text, it rotates every "h" to the hour, "w" to the minute & "s" to the second.

Chronometry[a] or horology[b] (lit. 'the study of time') is the science studying the measurement of time and timekeeping.[3] Chronometry enables the establishment of standard measurements of time, which have applications in a broad range of social and scientific areas. Horology usually refers specifically to the study of mechanical timekeeping devices, while chronometry is broader in scope, also including biological behaviours with respect to time (biochronometry), as well as the dating of geological material (geochronometry).

Horology is commonly used specifically with reference to the mechanical instruments created to keep time: clocks, watches, clockwork, sundials, hourglasses, clepsydras, timers, time
